Overview

Small businesses that want to accept payments online or in person can set up copy-and-paste pay links, buttons, and QR codes. You don't need a developer, coding knowledge, or a website to accept payments. If you already have a website, you can copy and paste PayPal buttons.

You can accept payments in a variety of situations, such as selling:

- Custom goods and services with custom pricing.
- Domestic and international goods and services.
- In person, such as at trade shows.
- On social media.
- Services with invoices.

[Build now](#)

Options

There are 3 copy-and-paste options to accept payments. All 3 options support payment methods such as PayPal, Venmo, Pay Later, and credit and debit cards.

When a buyer places an order and makes a payment, you'll receive the order details on your PayPal dashboard. You can provide shipping details to complete the order.

Payment method availability varies by region.

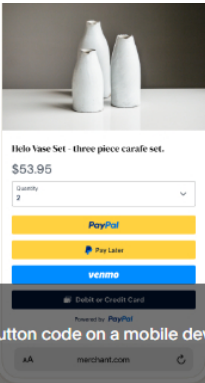

Button code

Button code helps you accept payments on your website wherever you paste the code. No coding knowledge required.

Mobile

Desktop

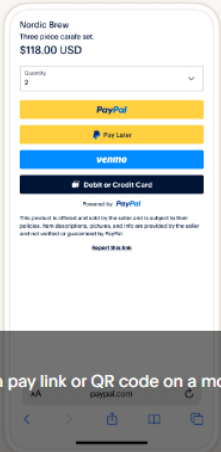

1 Buyer experience for button code on a mobile device

Pay link

A pay link takes buyers to a PayPal-hosted page that shows item details and payment method options. No website is required.

Mobile

Desktop

1 Buyer experience for a pay link or QR code on a mobile device

QR code

Creates a QR code that takes buyers to a PayPal-hosted page that shows item details and payment method options. Buyers can scan a QR code with a mobile device to pay. After the buyer scans the QR code, they see the same experience as a pay link. No website is required.

Availability

Copy-and-paste pay links and buttons are available to merchants with a PayPal business account in these [supported countries](#).

1 Create business account

If you're a new merchant, you'll need to sign up for a [PayPal business account](#) to get started.

Build pay links and buttons

1. Log in to your PayPal business account. Select the [Pay link or button](#) to see a page to build your pay link and button.
2. Pick your settings. Add required information such as **Pricing** and **Product name**.
3. Optional: Add information such as **Shipping fee** and **Tax rate %**.
4. Select **Change the look and feel** to modify the look and feel of payment method options from a list of colors and styles. You'll get a preview of how the information you entered will look as a button, payment link, or QR code.
5. Select **Build it**. Copy and paste the buttons, pay links, or QR codes wherever you need them.

Note: The button code includes step-by-step instructions to paste HTML or React into your website, depending on your website type. No coding knowledge is required.

This page is available in the following languages:

复制并粘贴付款链接和按钮
